

Development Growth & Differentiation

Published by

the Japanese Society of Developmental Biologists

Papers in Vol. 30, No. 5. (October 1988)

38. REVIEW: W. H. Clark, Jr. and F. J. Griffin: The morphology and physiology of the acrosome reaction in the sperm of the decapod, *Sicyonia ingentis*
39. P. V. Davydov, O. I. Shubrayi, and S. G. Vassetzky: Larval development of starfishes as revealed by long-term culture of the embryos
40. T. Matsuzawa, S. Ojima-Kasahara and M. Kitamura: Differential expressions of two types of alkaline phosphatase during developmental growth of embryoid bodies of mouse teratocarcinoma OTT-6050 *in vitro*
41. C. Nislow and J. Morrill: Regionalized cell division during sea urchin gastrulation contributes to archenteron formation and is correlated with the establishment of larval symmetry
42. Y. Fukui: Cell proliferation during bud formation of the quail uropygial gland
43. M. Yamasaki and A. Tonesaki: Developmental stages of the society finch, *Lonchura striate var. domestica*.
44. Y. Matsumoto, T. Kominami and M. Ishikawa: Timers in early development of sea urchin embryos
45. N. Tsuchimori, S. Miyashiro, H. Shibai and S. Ikegami: Significance of an increase of intercellular adenosine concentration for dormancy in starfish blastulae
46. T. Yamashita, K. Kawamoto and S. Kawashima: Arginine vasopressin contents of the hypothalamus and pituitary during fetal and postnatal development in the mouse
47. M. Maeda: Dual effects of cAMP on the stability of prespore vesicles and 8-bromo cAMP-enhanced maturation of spore and stalk cells of *Dictyostelium discoideum*
48. K. A. Tobal, D. K. Ellis and D. I. De Pomelal: Cellular *src* gene expression associated with leishmanogenesis in transdifferentiating cultures.

Development, Growth and Differentiation (ISSN 0012-1592) is published bimonthly by The Japanese Society of Developmental Biologists, Department of Biology, School of Education, Waseda University, Tokyo 160, Japan. 1988: Volume 30. Annual subscription U. S. \$ 110.00 including air speed delivery except Japan. Application to mail at second class postage rate is pending at Jamaica, NY 11431, U. S. A.

Outside Japan: Send subscription orders and notices of change of address to Academic Press, Inc., Journal Subscription Fulfillment Department, 6277 Sea Harbor Drive, Orlando, FL 32887, U. S. A. Send notices of change of address at least 6-8 weeks in advance. Please include both old and new addresses. U. S. A. POSTMASTER: Send changes of address to *Development, Growth and Differentiation*, Academic Press, Inc., Journal Subscription Fulfillment Department, 6277 Sea Harbor Drive, Orlando, FL 32887, U. S. A.

In Japan: Send nonmember subscription orders and notices of change of address to Business Center for Academic Societies Japan, 16-3, Hongo 6-chome, Bunkyo-ku, Tokyo 113, Japan. Send inquiries about membership to Business Center for Academic Societies Japan, 4-16, Yayoi 2-chome, Bunkyo-ku, Tokyo 113, Japan.

Air freight and mailing in the U. S. A. by Publications Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003, U. S. A.

VIII INTERNATIONAL CONGRESS OF PROTOZOOLOGY

TSUKUBA, JAPAN
July 10 - 17, 1989

Abstract Deadline: Feb. 28, 1989

PLENARY LECTURES

1. Evolution of nuclear phenomena in protozoa
2. The contribution of hypotrich ciliates to our understanding of molecular biology and evolution of ciliates.
3. Cilia in cell motility: membrane-controlled rotary engines
4. Molecular basis of differentiation in African trypanosomes
5. Advances in the biology of intestinal protozoa: *Entamoeba histolytica* and *Giardia lamblia*
6. The role of protozoa in nature in terms of physiological constraints of protozoan organization

SYMPOSIA

1. Genome organization and reorganization in ciliated protozoa
2. Protozoan genes: their structure, products and regulation of expression
3. Regulation of cell structure
4. Cell interactions in sexual phenomena
5. Role of cell membranes and cytoskeletal organization in cell motility
6. Cytology and cytochemistry of rumen protozoa
7. Immunology and chemotherapy of *Plasmodium*
8. Biology of haemoflagellates
9. Cyst-forming coccidia
10. Surviving mechanisms of intracellular protozoa
11. Piroplasmids
12. Dynamics of ecology of free-living protozoa
13. Endosymbionts of protozoa
14. Phylogeny and evolution of protozoa
15. Marine protozooplankton
16. Role of protozoa in biotechnology

NARISHIGE

THE ULTIMATE NAME IN MICROMANIPULATION

OUR NEW MODELS MO-102 and MO-103
MAKE PRECISION MICROMANIPULATION SO EASY!

(Photo: by courtesy of Olympus Optical CO., LTD.)

SOME FEATURES of MO-102 and MO-103:

- * The manipulator head is so small that it can be mounted directly on the microscope stage. There is no need for a bulky stand.
- * Hydraulic remote control ensures totally vibration-free operation.
- * 3-D movements achieved with a single joystick.
